

**CAMPUS DEVELOPMENT AND INFRASTRUCTURE PROGRAM**  
**International University of Tourism and Entrepreneurship of Tajikistan**  
**Implementation period: 2023-2030.**

**Annotation:** The Campus Development and Infrastructure Program (2023–2030) of the International University of Tourism and Entrepreneurship of Tajikistan aims to create a modern, environmentally sustainable, energy-efficient, and inclusive university environment aligned with national development priorities and global sustainability standards. The program includes the construction of new educational facilities, establishment of a Skills Development Center, AI Center, digital campus system iU-Portal, as well as the development of social infrastructure such as dormitories, cafeteria, and media studios. Environmental measures focus on energy-saving technologies, waste sorting, botanical garden development, and the formation of a campus seed bank. The program ensures inclusivity through a barrier-free environment and support mechanisms for socially vulnerable students.

The initiative contributes to a wide range of UN Sustainable Development Goals, including SDG 4 (Quality Education), SDG 7 (Affordable and Clean Energy), SDG 9 (Industry, Innovation and Infrastructure), SDG 10 (Reduced Inequalities), SDG 11 (Sustainable Cities and Communities), SDG 12 (Responsible Consumption and Production), SDG 13 (Climate Action), and SDG 17 (Partnerships for the Goals).

By 2025, more than 5000 students study in modernized facilities, over 100 multimedia classrooms are in operation, and 85% of the campus infrastructure has been updated using energy-efficient technologies. The program is over 90% completed, with new buildings, dormitories, and landscaped areas already in operation.

**Conclusion:** This program represents a successful model of integrating national priorities with global sustainability standards, ensuring the development of a green, innovative, and socially inclusive university campus.
