

FLORA, FAUNA AND GENETIC RESOURCES CONSERVATION PROGRAM

Annotation: The overall objective of the program is to conserve biodiversity, rare and endemic species of plants and animals in Tajikistan, as well as agro-genetic resources of value for food security and sustainable tourism.

Main tasks

6. Creation of green areas on campus (gardens, greenhouses)
7. Conservation of ornamental and medicinal plants typical for the regions of Tajikistan
8. Formation of a genetic bank of seeds and plants
9. Implementation of courses on ecology, agroecology and sustainable agriculture (curricula).
10. Involvement of international partners (CAREC, GIZ, OSCE).

Expected results

1. Conservation and cultivation of more than 50 plant species.
2. Creation of a research platform "Green Heritage Campus».
3. Preparation of an annual report on biodiversity.
4. Expanding cooperation with international universities.
5. Involving students and schoolchildren in eco-volunteering.
